Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/574,930	Applicant(s) MURAKAMI ET AL.	
	Examiner DAVID E. HARVEY	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2621

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) The preamble of claim 1 indicates that claim 1 is directed to a file reproduction "apparatus". As such, claim 1 is confusing and indefinite because the body of the claim (i.e., lines 3-24) fails to define the structure of the recited "apparatus" as is required of an apparatus claim. Claims 2-7 require similar clarification.

B) The preamble of claim 8 indicates that claim 8 is directed to a file reproduction "method". As such, claim 8 is confusing and indefinite because the body of the claim (i.e., lines 3-23) fails to define the "active steps of manipulation" the recited "method" as is required of a method claim. Clarification is required.

C) The preamble of claim 9 is confusing and indefinite because it is unclear from the preamble as to whether claim 9 is intended to recite:

1) A computer program, per se (i.e. which, if so, would constitute non-statutory subject matter under section 101);

2) A programmed computer, per se (i.e., an apparatus); or

3) A "method" of reproduction which was to be performed by a programmed computer.

Clarification is needed. Additionally:

1) It is noted that, if the claim is directed to a programmed computer, then the claim is also indefinite because the body of the claim fails to define the structure of the computer as is required of such "apparatus" claims; and

2) It is noted that, if the claim is directed to the reproduction method, then the claim is also indefinite because it appears that the body of the claims fails to define the active steps of manipulation which comprise the "method" as is required of method claims; i.e. as recited it is unclear as to how and if the recited "method" of line 2 relates the recited "processing procedure" of line 4 and lines 22-28.

Further clarification is needed.

D) The preamble of claim 10 indicates that claim 10 is directed to a "recording medium" having a program stored thereon which, when executed by the computer, causes the computer to perform a recited reproduction "method". However, the claim is confusing and indefinite because the body of the claim (i.e., lines 6-23) fails to define the "active steps of manipulation" the recited

“method” as is required of a method claim; i.e. and/or it is unclear as to how and if the recited “method” of line 3 relates the recited “processing procedure” of line 5 and lines 23-29. Clarifications are needed.

3. The following “prior art” is noted:

A) Japanese Patent Document # 2003-114845 to Kimura et al. has been cited because it discloses a system in which a “moof” is converted into “moov” via a modification of the header information associated therewith.
